Grant Criteria

The Grants Committee will use the following criteria when reviewing proposal-funding requests. The numbers in parentheses indicate total points possible.

1. How is this project innovative or creative? (15)
2. What is the educational value of this project? (25)
3. How many students are involved or affected by this project? (20)
4. How does this project fulfill an unmet need? (20)
5. Are the resources purchased for this project reusable? (15)
6. To what degree does this project encourage volunteer service? (5)

Please be sure to address the criteria in your grant application. If your project encourages student volunteer services, improves the quality of life in our community or requests equipment, please be sure to elaborate in the project description. The Foundation may not be able to fund all requests for budgetary reasons, even though a rejected request may be a beneficial project. The more criteria a request meets, the more likely it will be funded.

REACH grants are intended for items that, in general, are outside the scope of what can be funded by Ramapo Central. Requests for non-standard equipment, software or other resources that cannot be funded by Ramapo Central will be considered. *If your grant request requires equipment or hardware, please explain whether it has already been requested from the district, and what response, if any has been received.*

Applications requesting multiple year funding, teacher stipends, student scholarships, or teacher travel expenses will not be funded. Proposals to fund existing projects are discouraged unless the project will change significantly from its current status.
